- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Data Exploration
- Analysis Methods Overview
 - Data Collection
 - Data Analysis
 - Data Visualization
- Graphical Representation of Results
- Findings and Insights
- Conclusions

INTRODUCTION

- Stack Overflow is a question-and-answer website for programmers. It is the flagship site of the Stack Exchange Network. Every year, they survey nearly 100,000 developers across the world for insights into their work.
- While results do not represent everyone evenly, they are a great foundation for industry analysis.
- Predict trends in software development and associated professions globally.
- Maps the demographics of the developer community globally.

METHODOLOGY

- Data Collection
 - Web Scraping
 - APIs
 - URL Request Libraries
- Data Wrangling
- Exploratory Data Analysis
- Data Visualization
 - Data Distributions, Relationships
 - Compare and Contrast Findings
- Build Dashboards

RESULTS

PROGRAMMING LANGUAGE TRENDS

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Javascript is the most used language
- Python is growing quickly and poised to take over
- Typescript is unusually popular amongst developers too.

Implications

- Educational curriculum may implement Python as a language of choice in the future
- Typescript databases and learning materials will surge in popularity.

DATABASE TRENDS

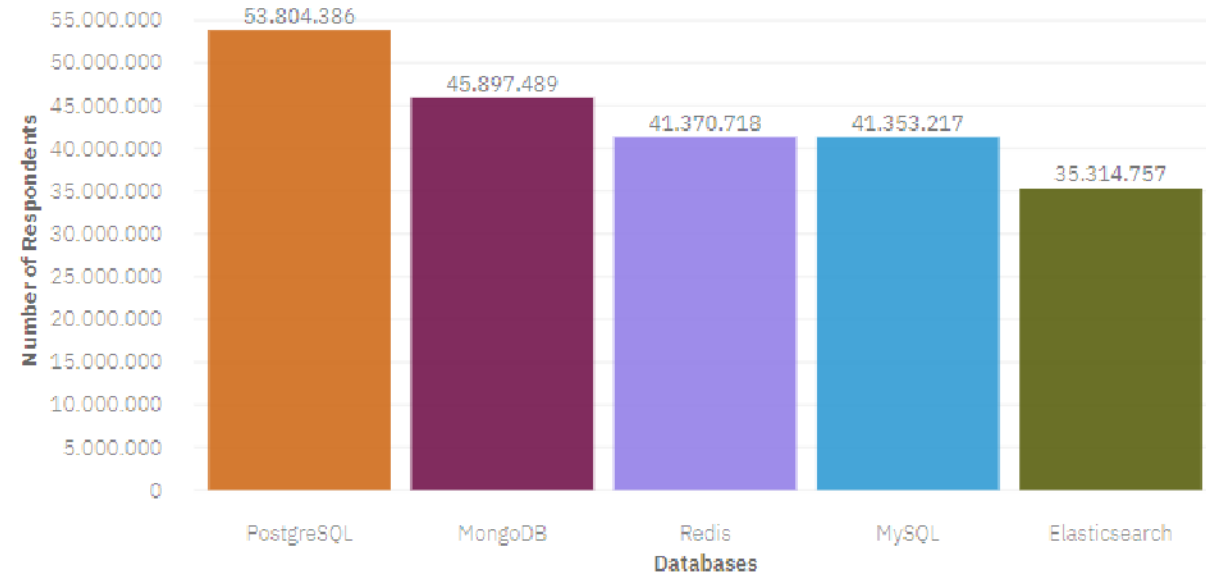

Current Year

DATABASE TRENDS-FINDINGS & IMPLICATIONS

Findings

- MySQL is top database used
- Microsoft SQL server and SQLite currently popular but may not remain interesting in the future.
- PostgreSQL and MongoDB rising in popularity.

Implications

- Microsoft SQL Server and SQLite will lose market share.
- PostgreSQL and MongoDB to see a rise in resources and learning materials within developer community.

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Javascript is the most used language
- Python is growing quickly and poised to take over
- Typescript is unusually popular amongst developers too.
- MySQL is top database used
- Microsoft SQL server and SQLite currently popular but may not remain interesting in the future.
- PostgreSQL and MongoDB rising in popularity.

Implications

- Educational curriculum may implement Python as a language of choice in the future
- Typescript databases and learning materials will surge in popularity.
- Microsoft SQL Server and SQLite will lose market share.
- PostgreSQL and MongoDB to see a rise in resources and learning materials within developer community.

CONCLUSION

- Typescript will need to refine its product delivery to make it more accessible to new developers due to rising interest
- Microsoft must invest additional \$'s in order to improve its SQL server to remain competitive
- MongoDB will be a good long-term bet due to its intuitive interface and numerous integrations.

APPENDIX

- Include any relevant additional charts, or tables that you may have created during the analysis phase.
